THE OUTFIT

The Outfit è il programma di finiture che veste la rubinetteria, i soffioni doccia e gli accessori bagno con un abito su misura, adatto al contesto e al gusto dell'utilizzatore.

Una terminologia, ma soprattutto un concetto, che trae ispirazione dal mondo della moda e approda nell'ambiente bagno, sempre più spazio domestico da arredare ponendo la massima attenzione ai dettagli e alle possibilità di personalizzazione.

The Outfit si compone di un'ampia e completa gamma di finiture basate su una nuova e innovativa tecnologia, denominata Advanced Superfinish Process (ASP), frutto di un mix di processi produttivi di avanguardia.

Ogni finitura o colore possiede una sua ricetta, unica e distintiva.

The Outfit is a programme of finishings that "dresses" taps and mixers, shower heads and bathroom accessories with a made-to-measure outfit, adapted to the context and to the user's taste. Outfit is a word and, above all, a concept that draws inspiration from the world of fashion and is now applied to bathrooms, which are increasingly becoming a domestic space to be furnished by paying the utmost attention to detail and customisation options. The Outfit comprises a wide and complete range of finishings based on a new and innovative technology, called Advanced Superfinish Process (ASP), which is the result of a mixture of cutting-edge production processes. Each finishing or colour has its own unique and distinctive recipe.

PROCESS

ASP è:

- alto valore estetico, garantito da sofisticati trattamenti superficiali che donano al metallo colori, toni e riflessi unici;
 - non improntabilità sulle finiture opache e limitata improntabilità sulle finiture lucide e specchiate;
 - elevata durata nel tempo comprovata da severi test di laboratorio.
- The Outfit propone famiglie di finiture trasversali, che abbracciano più modelli e collezioni di rubinetteria caratterizzate da design e stili differenti.

ASP is:

- a high aesthetic value thanks to sophisticated surface treatments that imbue metal with unique colours, shades and reflections;
- highly fingerprint resistant on matt finishings and less fingerprint resistant on polished and mirrored finishings;
- extreme durability proven by the stringent laboratory tests required to be passed.

The Outfit offers families of versatile finishings, designed for numerous models and collections of taps and mixers, which come in different designs and styles. Each family contains different outfits (finishings, colours or shades), traditional or innovative, classic or unusual, with surface finishing processes or special combinations, all continuously updated.
